It's easy to search Wikibooks by topic, and there are separate sections for recipes and childrens' texbooks. You can download any page as a PDF using a link provided in the left-hand menu, but unfortunately there's no support for other formats. There's also Collection Creator – a handy tool that lets you collate several pages, organize them, and export them together (again, in PDF format). It's a nice feature that enables you to customize your reading material, but it's a bit of a hassle, and is really designed for readers who want printouts. The easiest way to read Wikibooks is simply to open them in your web browser.

Anyhow, in 1988, Seiko decided to end production of the 6309 series of movements and replaced this watch with the Seiko 7002 and its 7000-series of movements. We'll never truly know why Seiko made the switch, but a look at the movement shows stamped versus machined parts, a lot more plastic, and less expensive finishing.

The Seiko caliber 7002A is an automatic movement with 17 jewels found in many pre-SKX Seiko divers. This caliber was introduced in the late 1980s after Seiko started to phase out the production of the caliber 6309 around 1988. Seiko produced the 7002 until circa 1996 – which is when the caliber 7S26 was introduced.
