An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia

Overview. Drawing can be loosely defined as mark-making on a flat surface. Usually, the mark-making device is a pencil and the flat surface is a sheet of paper, but many other combinations of tools and surfaces are possible. As such, sometimes it is hard to categorize a work as drawing as opposed to some other kind of art, such as painting, printmaking, digital media, or sculpture, which often incorporate mark making. when you draw for your drawing to look like someone else's drawing, then ...
