Drug interactions can also contribute to the cost of healthcare, as a serious drug interaction could result in injury, hospitalization, or rarely, death. Not all drug interactions are bad. Some medications may be better absorbed if taken with food or may have more favorable blood levels if taken with other medications that affect metabolic enzymes.

As medication experts, pharmacists should recognize their responsibility to clearly communicate the risk of possible food-drug interactions for both prescription and OTC medicines. Here are some of the most dangerous food-drug interactions that pharmacists can help prevent: 1. Calcium-Rich Foods + Antibiotics

### **5 Dangerous Food-Drug Interactions - Pharmacy Times**

Other Interactions . Certain medicines should not be used at or around the time of eating food or eating certain types of food since interactions may occur. Using alcohol or tobacco with certain medicines may also cause interactions to occur. Discuss with your healthcare professional the use of your medicine with food, alcohol, or tobacco.
