Such paper consists of a rectangular grid. Similar graphing paper exists for plotting points and functions in polar coordinates, similar to Figure 6.4.4. FIGURE 6.4.4 Polar Coordinate Graph. The angle (θ) can be given in either degrees or radians, whichever is more convenient. Radians are often preferred when graphing functions in polar coordinates. The reason is that, unlike degrees, radians can be considered "unitless" (as we mentioned in Chapter 4).
