There is additional helpful information in the Lazarus Tutorial. The Use of a Second Form. The tutorial shows how to use multiple forms in a project. In this example, only two forms, Form1 (main form) and Form2, are created, but the process is identical for additional forms. There is a main form with a button, which when clicked opens the new form.

Form Tutorial - Lazarus wiki

TACart is Lazarus' powerful charting library. It consists of numerous classes and declarations distributed over some 50 units. New users may be overwhelmed by the complexity of usage, and even experienced charters still find gems from time to time. In order to demonstrate the possibilities of TACart a variety of demo projects has been written.
