a fundamental basic  
for networking  
programming is  
interprocess  
communication (IPC),  
and a requisite for  
understanding IPC is a  
knowledge of what  
constitutes a process.

Networking APIs ...**

According to "UNIX  
Network  
Programming", all  
TCP/IP  
implementations must  
support a minimum IP  
datagram size of 576  
bytes, regardless of the  
MTU. Assuming a 20  
byte IP header and 8  
byte UDP header, this  
leaves 548 bytes as a  
safe maximum size for  
UDP messages.
